## Data Source

The data used to produce this report are sourced from the live Student Loans Company (SLC) application database. The data refer to all applications received for Advanced Learner Loans, which include both unprocessed and processed applications, but exclude those ineligible, cancelled, deleted and in data entry. The live database provides information on applications, and is updated on an ongoing basis due to applications being processed, therefore data presented throughout the academic year are subject to change. A database snapshot provides data on applications (including application state) as it was held for any given date. This report uses application data on the 31 January 2017 for the 2016/17 academic year. Data presented in this report may also change for particular applications at some point in the future.

Figure 1 provides an overview of different application states. The state of an application can depend on various factors, including how much progress has been made processing the application, as well as the accuracy of the information and supporting evidence provided. In the Advanced Learner Loans report, the definition of applications received exclude those that are in data entry, ineligible, cancelled or deleted.

**Figure 1 – Process map of application states**

Applications move between different states on an ongoing basis. For example, an application may be in data entry and move to awaiting approval or an application that has been approved may move into the cancelled, deleted or in data entry state. It is therefore possible that the number of applications received could decrease from one month to the next if a large amount of applications move to the states in the red boxes and are no longer classed as an application received. Also, due to the changing of states, the sum of monthly application states over the course of the academic year will not equal the total for the full academic year.

## Other Related Statistics

On 26 January 2017, the Department for Education published the [Further Education and Skills Statistical First Release](#), which contains full year figures relating to the number of learners participating in FE who are funded through the Advanced Learner Loans system ([see Table 26](#)). Figures on learner participation include learners whose course started in previous academic years and continued into 2016/17, so figures are not comparable to those in this report.

The Student Loans Company also published their [Advanced Learner Loans Paid in England](#) publication on 26 January 2016, which includes information on payments made to FE providers on behalf of loans-funded learners during the 2013/14 – 2016/17 academic years. Data presented here relates to learners who are participating on a further education course funded by an advanced learner loan, and hence are not directly comparable to the application figures presented in this report.

On Thursday 16 June 2016, the Student Loans Company published [Debt and Repayment statistics for England](#), which included figures debt and repayment relating to some Advanced Learner Loans for the 2015/16 financial year.
